

# Bolinda South Devon Final Dispersal Sale

## 70 lots in total

11am Thursday 2 November 2017

[www.auctionsplus.com.au](http://www.auctionsplus.com.au)

39 stud cows & calves

3 stud cows PTIC

18 stud heifers unjoined

45 commercial females

(unjoined, PTIC, cows & calves in groups of 4-8)

2 J drop sires

[www.bolindasouthdevons.com.au](http://www.bolindasouthdevons.com.au)

---

## **BOLINDA SOUTH DEVONS**

The Bolinda South Devon Stud has been run under commercial conditions at Willala and Goolhi NSW. The stud was founded in 1998 with the purchase of cows from the Nardlah Reduction Sale, Craivon Dispersal, Braeburn Dispersal, Waminda Dispersal and from Alpha and Ace, Lincoln, Merilba and Gadara.

A crossbred commercial herd that focused on supplying carcasses to Woolworths Supermarkets was also run. The carcass attributes of the herd are evident when the majority of the carcasses grade above the MSA Index value of sixty one.

In 2015 a pen of Bolinda steers were entered in the RAS Beef Challenge. This pen was placed 3<sup>rd</sup> out of 55 pens.

In 2016 a Bolinda steer was awarded the highest MSA index score at the Brisbane RNA Paddock to Palate competition.

With Brian's sudden passing, we have decided to disperse the stud herd to allow other South Devon enthusiasts the ability to enjoy and own the cattle that Brian had so much passion for. This sale represent the final stage of the dispersal with all suitable remaining females being offered for sale. The cattle are being offered in good faith as a genuine dispersal of cattle that have formed the backbone of Brian's breeding program.

## **SALE INFORMATION**

**INSPECTIONS:** Inspection of cattle is encouraged prior to auction by contacting vendor representative, Lachlan James, on 0402839373. Cattle are located at 'Derwent Park' 3846 Goolhi Rd Gunnedah. Inspections can be made the week prior to the sale by contacting Lachlan.

**REBATE:** 2% to outside agents nominating buyers to Fleming & Ross in writing 24 hours prior to auction. This rebates relates to the purchase of registered females only and is not available on commercial lots. This will be strictly enforced.

**DELIVERY:** It is expected that successful purchasers will organise their own transport and delivery. Unless organised prior to the sale, it is expected that all purchased lots will be picked up within 7 days of the sale. Bolinda will not be transporting any animals, however, we recommend Dougal Geddes Transport, 0429432552.

Pickups need to be notified to Lachlan James, 0402839373, at least 24 hours prior to anticipated dispatch.

**BUYER'S INSTRUCTION:** After the auction, all successful purchasers are to contact the selling agents prior to delivery.

**NLIS:** It will be the responsibility of the purchaser for the NLIS transfer. Bolinda PIC is NG505722

**HERD HEALTH:** The Bolinda herd is TB and Brucellosis free and have never suspected or found any animal to have Johne's Disease. The herd is in a Johne's Protected area.

**TATTOOS/REGISTRATIONS/TRANSFERS:**

All cattle (other than some calves, where indicated and lots described as commercial) are registered with the South Devon Cattle Society. All registered cattle are identified with a visual ear tag. Some cattle may not have been tattooed or have hard to read tattoos. All registered lots will be transferred to the purchaser free of charge. Successful purchasers accept responsibility for applying/reapplying tattoos should they be required.

**GUARANTEE:** As this sale represents part of the conclusion of the Bolinda South Devon herd, all cattle are being sold in good faith without guarantee or warranty. All mature females, where appropriate, have been vendor pregnancy tested with results presented in the catalogue and supplementary sheet. Purchasers should note that all lots are at the purchaser's risk at the conclusion of the auction.

**DISCLAIMER:** All breeding and joining details indicated in the catalogue were determined by Brian's detailed joining records. Where a joining was not absolutely clear in Brian's records we have indicated it as such in the catalogue comments. While all care has been conducted in the compilation of the catalogue, the vendor and agents take no responsibility for any omissions, errors or misinterpretations that may be present. All cattle are sold in good faith.

## **AuctionsPlus Information**

### **This sale is only through AuctionsPlus**

To bid via AuctionsPlus, contact your local agent or register online at least 48 hours prior to the sale commencing. Registration is free and easy, click the register tab on the AuctionsPlus home page to receive your log in details. Remember to have your PIC number and contact details ready. If you are already an AuctionsPlus user simply log in with your user name and password then click connect to Bolinda South Devon Sale.

First time users of AuctionsPlus must click on Downloads found on the left hand side menu to make sure Silverlight has been installed on your computer. This software allows you to access the site and sale. Silverlight can take up to 10 minutes to download.

All your livestock agents should be able to assist you with bidding in an AuctionsPlus auction if required.

## **COMPARING ANIMALS USING EBVs**

EBVs are a tool that will help you to make more educated decisions when you are choosing breeding stock. The best way to make use of this information is to first decide YOUR breeding goals and secondly to select animals with EBVs that match those criteria.

**Gestation Length EBV (days)** is based on AI records. Lower (negative) GL EBVs indicate easier calving and increased growth after birth.

**Birth Weight EBV (kg)** is based on the measured birth weight of animals, adjusted for dam age. The lower the value the lighter the calf at birth and the lower the likelihood of a difficult birth. This is particularly important when selecting sires for use over heifers.

**200-Day Milk EBV (kg)** is an estimate of an animal's milking ability. For sires, this EBV indicates the effect of the daughter's milking ability, inherited from the sire, on the 200-day weight of her calves. For dams, it indicates her own milking ability.

**200 Day Growth EBV (kg)** is calculated from the weight of progeny taken between 80 and 300 days of age. This EBV is the best single estimate of an animal's genetic merit for growth to early ages.

**400-Day Weight EBV (kg)** is calculated from the weight of progeny taken between 301 and 500 days of age, adjusted to 400 days and for age of dam. This EBV is the best single estimate of an animal's genetic merit for yearling weight.

**600-Day Weight EBV (kg)** is calculated from the weight of progeny taken between 501 and 900 days of age. This EBV is the best single estimate of an animal's genetic merit for growth beyond yearling age.

**Scrotal Size EBV (cm)** is calculated from the circumference of the scrotum, measured in centimetres and adjusted to 400 days of age. This EBV is an estimate of a sire's genetic merit for

scrotal size and is positively correlated to age of puberty in female progeny.

**Eye Muscle Area EBV** (sq cm) This EBV estimates genetic differences in eye muscle area at the 12/13<sup>th</sup> rib site of a 300 kg dressed carcass. More positive EBVs indicate better muscling on animals. Sires with relatively higher EMA EBVs are expected to produce better muscled and higher percentage yielding progeny at the same carcass weight than will sires with lower EMA EBVs.

**Rib Fat and Rump Fat EBVs** (mm) are calculated from measurements of subcutaneous fat depth at the 12/13 rib site and the P8 rump site (from live animal scans and from abattoir carcasses) and are adjusted to a standard 300 kg carcass. These EBVs are indicators of the genetic differences in fat distribution on a standard 300 kg carcass. Sires with low, or negative, fat EBVs are expected to produce leaner progeny at any particular carcass weight than will sires with higher EBVs.

**Retail Beef Yield Precent EBV** (%) represents total (bone out) meat yield as a percentage of a 300kg carcass. A more positive EBV indicates higher percentage yield for the 300kg carcass size.

**Intra-muscular Fat Percent EBV** (%) is an estimate of the genetic difference in the percentage of intra-muscular fat at the 12/13<sup>th</sup> rib site in a 300kg carcass. Depending on market targets, larger more positive values are generally more favourable.

# **TERMS AND CONDITIONS OF SALE**

**The Stock** - As all lots are open for inspection prior to the sale, the stock offered are to be sold with all faults and the buyer must satisfy themselves as to the condition, quality and fitness there of before bidding. No error or misdescription shall invalidate any sale or give rise to any claim for compensation.

Bidding will be exclusive of GST, with GST being added to the final auction price and invoiced to the buyer.

**Payment** - Unless otherwise stipulated by the selling agents, at the commencement of the sale, all lots shall be sold for cash.

Interest at the rate from time to time charged by selling agents shall be paid in any case where a purchaser makes default on due payment.

**DISCLAIMER** Whilst all due care and attention has been paid to the accuracy in the compilation of this catalogue, neither the vendor nor the selling agents or representatives therefore assume any responsibility whatsoever for the correctness, use or interpretation of the information on animals included in this catalogue.
